INDEXES

Subject Index to Volume 7

A

Adenosine, function, heart, 52
Adenosine diphosphate, platelet receptors, shape change and inhibition adenylate cyclase, 274
Adenosine monophosphate, cyclic, type II, protein kinase dependent on, 143
Adenosine triphosphate
  extracellular
    catecholamine release and, neuronal cells, 56
    multiple side effects, cardiac tissue, 212
Adenylate cyclase, platelet ADP receptor inhibition of, 274
Aging
  dietary key to, 157
  origins and causes (Perspectives), 38
Airway, inhaled particles, displacement by surface forces, 1
Albumin, binding of fatty acids to, 264
Antibody fragments, specific human, without immunization (News), 92
Area postrema, regulation, cardiovascular function, 30
Arrhythmias, malignant, cellular mechanism for, 254
Arterial tone, regulation by nitroxidergic nerve, 148
Arterioles, vasoactive reactions of, microvascular endothelium modulation of, 5
ATP: see Adenosine triphosphate
Atrial natriuretic peptide, inhibition, hypothalamic neurons, 75

B

Blood flow: see *also* Circulation
  control during exercise, endothelial and smooth muscle cells, 152
Bohr effect (Perspectives), 284
Brain, recall of a word (News), 92
Breathing: see Respiration
Burn trauma, physiology, 225

C

Calcium
  entry, nonexcitable cells, 108
  role in transporting epithelium, 105
Calcium ions, ATP receptor-operated influx, catecholamines and, neuronal cells, 56
Cannon's Emergency Theory (Perspectives), 80
Cardiac output, right atrial pressure, Starling's relationship (Perspectives), 134
Cardiovascular function, area postrema regulation of, 30
Catecholamines
  release, extracellular ATP and, neuronal cells, 56
  stimulation, sodium-potassium pump, 95
Caudate nucleus, pain modulation and, 203
Cell division
  algorithm for (News), 46
  membrane traffic jams (Trendsetters), 141
Cellular mechanisms, ventricular fibrillation, 254
Cell volume, protein kinases and phosphatases in, 232
Cerebral cortex, regulation of circulation, 124
Cholinergic agonists, state-dependent respiratory depression, 220
Circulation: see *also* Blood flow
  control, opioid system in, 26
  regulation, cerebellar cortical, 124
Contraction-relaxation, regulation of, smooth muscle, 59
Coronary arteries, contractions, platelet-activating factor influence on, 166
Coronary vasospasm, platelet-activating factor influence on, 166
Coupling
  excitation-contraction
    protein kinase C and, vascular smooth muscle, 10
    skeletal muscle, magnesium in, 270
Cytoarchitecture, goblet cell (insect), 19

D

Development, fetal and postnatal, renal sympathetic innervation during (Perspectives), 130
Diuresis, renal perfusion pressure and, spontaneous hypertension, 23

E

Electrical stimulation, peripheral, neuropeptides, 176
β-Endorphins, mobilization of, peripheral electrical stimulation, 176
Endothelial cells, prostacyclin synthesis, regulation of, 64
Endothelin
  endothelium-derived relaxing factor and, hypertension, 120
  receptors and transmembrane signals, 207
Endothelium, microvascular, modulation of arteriolar tone, 5
Endothelium-derived relaxing factor, endothelin and, hypertension, 120
Enkephalins, mobilization of, peripheral electrical stimulation, 176
Epithelium, transporting, calcium role in, 105
Erythrocytes, high water permeability in, 172
Ethics, biomedical sciences (Letter, Reply), 140
Exercise
  blood flow control during, endothelial and smooth muscle cells, 152
  swimming, how the lamprey swims, 161
Exercise physiology, Horace Smirk (Perspectives, 88
Exocytosis, neutrophil activation during, 215

F

Fatty acids, binding, albumin, 264
Feedback, negative, regulation beyond (Perspectives), 184
Food intake, aging and, 157

G

Gas, exchange, lungs, gills, and skin, 199
Genes, products and function, muscular dystrophy, 195
Gills, gas exchange, vertebrates, 199
Goblet cell, cytoarchitecture (insect), 19

H

Heart
  adenosine function in, 52
  neuroendocrine, hypothalamus and, 279
  tissue, multiple side effects of ATP in, 212
Hemocyanin, oxygen-carrying function of, modulation (crustaceans), 49
Hemorrhage, recovery from, area postrema and, animal model, 30
Heparin, discovery of (Perspectives), 237
Hermann Rahn (Perspectives), 185
Hypertension
  area postrema in, animal model, 30
  endothelin, endothelium-derived relaxing factor and, 120
  spontaneous, pressure to the renal interstitium in, 23
Hypothalamus
  neuroendocrine heart and, 279
  neurons, inhibition by atrial natriuretic peptide family, 75

I

Inositol tetrakisphosphate, messenger role (Trendsetters), 193
Insulin, stimulation, sodium-potassium pump, 95
Insulin-like growth factor, signaling system, interactions in, 69
Intestine, potassium transport, cytoarchitecture (insect), 19
IUPS, news from, 48, 94, 191, 245, 290

K

Kidney
  interstitium, pressure, spontaneous hypertension, 23
  sympathetic innervation, effects during fetal and postnatal development (Perspectives), 130
Kidney tubules, proximal, high water permeability in, 172

L

Lipid-protein interactions, case study of, 264
Locomotion, how the lamprey swims, 161
Lungs, gas exchange, vertebrates, 199

M

Magnesium, excitation-contraction coupling, skeletal muscle, 270
Models, mouse, muscular dystrophy, 195
Muscle, skeletal, excitation-contraction coupling, magnesium in, 270
Muscle, smooth
  contraction-relaxation in, 59
  diversity and rhythmicity, 100
  relaxation, nitric oxide and vasoactive intestinal peptide as cotransmitters of, 181
  vascular
    excitation-contraction coupling pathway and protein kinase C in, 10
    regulation of tone, 113
Muscle cells, endothelial and smooth, blood flow control during exercise and, 152
Muscle fibers, smooth, diversity and rhythmicity, 100
Muscular dystrophy, gene products and function, 195
Myosin, phosphorylation, smooth muscle relaxation and, 59

N

Natriuresis, renal perfusion pressure and, spontaneous hypertension, 23
Natriuretic peptides, role in osmoregulation (fish), 15

N

Natriuresis, renal perfusion pressure and, spontaneous hypertension, 23
Natriuretic peptides, role in osmoregulation (fish), 15

0886-1714/92 $2.00 © 1992 Int. Union Physiol. Sci./Am. Physiol. Soc.

Neuronal cells, extracellular ATP effects, catecholamines and calcium in, 56
Neurons
hypothalamic, inhibition by atrial natriuretic peptide family, 75
network, dissection, white-noise analysis, 259
Neuropeptides, mobilization of, peripheral electrical stimulation, 176
Neutrophils, activation, control of, 215
Nitric oxide
endothelin and, hypertension, 120
regulation of arterial tone, 148
vasoactive intestinal peptide and, cotransmitters of smooth muscle relaxation, 181
Nitroxidergic nerve, regulation of arterial tone, 148
Noeud vital, mammals, localization of (Trendsetters), 142
Nucleus, getting the message (Trendsetters), 247

O

Opioid peptides, circulatory control and, 26
Osmoregulation, natriuretic peptide role in (fish), 15
Oxygen, hemocyanin carrying of, modulation (crustaceans), 49
Oxygen metabolites, reactive, modulation of tumor necrosis factor, 34

P

Pain, modulation, caudate nucleus and, 203
Particles, inhaled, displacement by surface forces, airway, 1
Permeability, high water, proximal tubules, 172
Pharmacology, burn trauma, 225
Phosphatase, protein kinases and, control of cell volume, 232
Physiology, hidden curriculum (Perspectives), 41
Platelet-activating factor
coronary vasospasm and, 166
receptor, multiple signaling pathways for, 72
Platelets, activation, calcium concentration role in, 108
Potassium, transport, goblet cell (insect), 19
Pressure
capillary, regulation of, 113
renal interstitial, spontaneous hypertension, 23
Prostacyclin, synthesis, regulation, endothelial cells, 64
Protein kinase
phosphatases and, control of cell volume, 232
type II cAMP-dependent, subcellular localization of, 143
Protein kinase C, excitation-contraction coupling, vascular smooth muscle, 10

R

Receptors: *see also* specific type
endothelin, transmembrane signals and, 207
opioid, circulatory control and, 26
Reflexes: *see also* specific type
baroreflexes, area postrema control of, animal model, 30
Respiratory burst, neutrophil activation during, 215
Respiratory depression, state-dependent, cholinergic pontine mechanisms causing, 220
Respiratory training, one more round after (Trendsetters), 247

S

Segmental motor system, study of, 249
Signaling pathways, platelet-activating factor receptor, 72
Skin, gas exchange, vertebrates, 199
Sleep, REM, cholinergic pontine mechanisms causing, 220
Smirk, Horace, exercise physiology (Perspectives), 88
Sodium-potassium pump, activity, 95
Starling's law of the heart, descending limb (Perspectives), 134
Surfactant, airway, displacement of inhaled particles, 1
Sympathetic nerves, renal, in fetal and postnatal development (Perspectives), 130
Synaptic transmission, zeroing in (Trendsetters), 193

T

Transmembrane signals, receptors and, endothelin, 207
Tumor necrosis factor, regulation by reactive oxygen metabolites, 34

V

Vascular control systems, differentiated sites of, 113
Vasoactive intestinal peptide, nitric oxide and, cotransmitters of smooth muscle relaxation, 181
Ventricular fibrillation, cellular mechanisms for, 254

W

Water channels, quest for, 172
White-noise analysis, dissection of neuron network through, 259
